

# **DTQ-5**

## **Low Speed Precision Saw**

### ***Description:***

- ☞ Low-Speed precise cutting machine model DTQ-5 is suitable for precise cutting of assorted hard materials, especially suitable for cutting high-value fragile artificial crystals.
- ☞ The machine is equipped with four clamps that can hold the subjects to be cut at the optimum angle. With a limit switch, the machine can run itself without the supervision of the operator. The running accuracy of main shaft is good and it can precisely adjust the lateral feed position of the subjects to be cut.

### ***Specifications:***

<b>Model</b>	DTQ-5
<b>Stroke of Movable Frame (mm)</b>	25
<b>Positioning Accuracy (mm)</b>	0.01
<b>Rotate Speed of Main Shaft (rpm)</b>	0-700
<b>Diameter of Saw Disc (mm)</b>	φ100~φ150
<b>Power (Watt)</b>	50
<b>Voltage (Volt)</b>	110/ 220 VAC
<b>Overall Dimension (mm)</b>	350×350×200
<b>Weight (Kg)</b>	18.5
